Premium Underfloor Systems

Parking spaces that nobody notices

Opening Up More Space for Living

Creating a parking area where space is limited. Vehicles that disappear in underground. Gaining more space for living. Our new premium underfloor systems deliver all of this – and more! By combining maximum comfort with optimal use of space, these state-of-the-art systems have set new standards in engineering. Our underfloor systems create space for up to six parked vehicles in areas where it would seem impossible – from inner courtyards to the narrowest access areas. Above ground, you have a vehicle-free area that you can turn into whatever you want – an enormous benefit for increasing the value of your property.

Your advantages with all of our underfloor systems

- **Flush to the ground and can be driven on:** Up to three levels are possible – the vehicles cannot be seen
 - **Highly flexible system:** Perfect even for heavy or tall vehicles – up to 2,600 kg weight, 520 cm length and 200 cm height (165 cm for the U3) per parking space
 - **Easy opening of vehicle doors:** Steel supports located at the outer corners
 - **Efficient rainwater drainage:** Platforms equipped with controlled downspout
 - **EasyWalk platform surface:** Especially suited for walking and driving
 - **Design freedom:** Tray cover for customized surfaces
- **Platform width:** Single platforms up to 270 cm, double platforms up to 540 cm
 - **Pit depths:** 250/255 cm, 495/500 cm, 605/610 cm
 - **Standard design:** 2,000 kg per parking space

Single or double platforms are possible for all three types:

multibase U1
For 1 to 2 spaces

multibase U2
For 2 to 4 spaces

multibase U3
For 3 to 6 spaces

Always the right solution – even in tight conditions

Whether it's the front garden area, other green spaces or a courtyard behind the building – anywhere the pit dimensions are possible can be used to create room for parking with an underfloor garage. There are many options available for decorating the surface, such as paving stones, grass and many other customer-specific surfaces. Your new underfloor system will be practically invisible to the eye.

This underfloor garage is completely independent of the building, providing a safe place for your car so that you have 100% run of the house and yard for your family and your hobbies – an incredible increase in your quality of life.

Numerous customization options to meet your needs

All of our underfloor types can come equipped with our robust, high-grade AluLongLife surface with a 12-year guarantee. This easy-to-maintain platform surface considerably increases the life-time of your system. It also provides an excellent surface for walking or driving and is perfectly suited for persons who are physically challenged. Other customizations include our BikeSafe bicycle stand, electrical charging stations, and more.

Our experts make sure you receive the best service possible – from planning and implementation to system maintenance.
