

Office Building in Melbourne

23 trendvario parking spaces in confined space

Creative work in the heart of Melbourne

The office building designed by JAM Architects succeeds in making an impression in an extremely restricted space, owing to its simplicity in design and functional glass and steel construction. The building, which is located in a creative district in the east of Melbourne, offers 23 parking spaces, despite its small footprint. The entrance to the TrendVario parking spaces is at ground level.

LOCATION: Melbourne, AUS

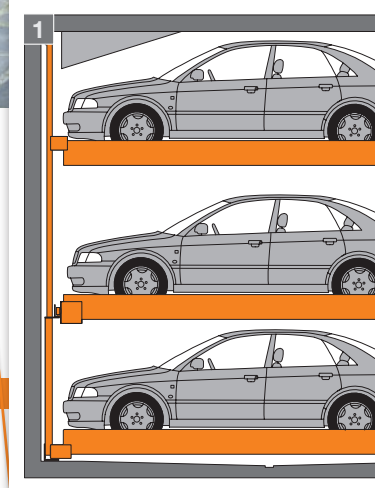

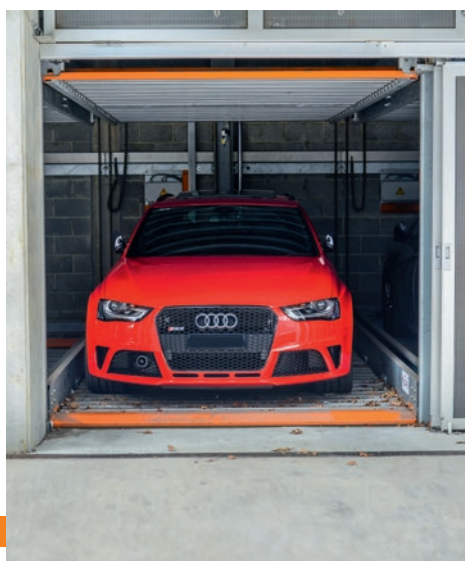

COMPLETION: 2011

ARCHITECT: JAM Architects

BUILDING CONTRACTOR: Element 5

PARKING SOLUTION: TrendVario
4300

SEMI-AUTOMATIC PARKING SYSTEMS

Space-saving parking with the right look

Having your own parking space in the boomtown of Melbourne is certainly not to be taken for granted. This is even more true in the cramped building conditions found in Howard Street 7. The parking solution implemented using TrendVario 4300 manages to make convenient parking in a confined space possible. The gates to the parking spaces are a particular highlight. The gates fit into the façade perfectly, without compromising the aesthetics.

» THIS IS A HIGH PROFILE PROJECT FOR US BECAUSE IT IS DIRECTLY ACCESSIBLE FROM THE ROAD AND IS PART OF THE FACADE OF THE SYSTEM. IT HAS A VERY HIGH SPECIFICATION AND THE CLIENT WAS VERY PARTICULAR ABOUT ACHIEVING A HIGH LEVEL OF FINISH. THE CLIENT'S BUILDING IS VERY MUCH PART OF HIS BRAND AS IT REPRESENTS THE QUALITY OF HIS WORK TO HIS CLIENTS SO IT WAS VERY IMPORTANT THAT WE ACHIEVED A GOOD RESULT. ACCORDINGLY, WE ALSO USE THIS SYSTEM FOR PROMOTIONAL USE BECAUSE IT IS ALSO SO IMPRESSIVE FOR OUR POTENTIAL CUSTOMERS. «

TrendVario 4300 in Melbourne office building

- 23 parking spaces on TrendVario 4300
- Vehicle weight: 2,000–2,600 kg
- Platform width: 2.00 m
- Platform depth: 4.05 m
- Special features: electric gates directly integrated into façade

1 TrendVario 4300 can accommodate two vehicles one above the other. 2 With the TrendVario 4300, a third level is also possible. 3 A vacant space enables independent parking, which means that the car can be positioned regardless of whether the bottom parking space is free.

When you smile, we have achieved our goal.

Premium parking systems from KLAUS Multiparking are tailored to individual requirements. By making the best possible use of available space, they truly make parking a breeze. Every one of our systems is the result of decades of experience, established expertise and the exceptional quality that is expected from products made in Germany.

KLAUS Multiparking is active all over the world: With over 600,000 parking spaces created and 65 sales partners representing every continent, we are one of the top international suppliers of innovative multiparking systems.
