

The “Rheinauhafen” in Cologne

139 trendvario parking spaces

in Europe’s longest underground garage

Imposing dockside cranes in disguise

An impressive spectacle is on display on the banks of the river Rhine: giant structures soaring 60 meters into the air that resemble dockside cranes but are used as residential and office buildings. The complexes situated between these magnificent structures also offer ample space for business and living. For area residents and workers, there is another spectacle available: the public underground parking garage just for them – featuring advanced TrendVario systems.

Space-saving parking right next to the Rhine

At 1.6 km, the underground parking area located directly next to the Rhine is the longest public underground parking garage in all of Europe. It was indeed a challenge to optimize the space available to create additional parking opportunities here. The result? 139 space-saving parking spaces offering the full convenience of TrendVario 4200 and 4300 systems. And thanks to a perfect logistical situation, the public garage was able to operate fully while the TrendVario systems were being placed and installed.

LOCATION: Cologne, Germany

COMPLETION: 2011 to 2013

- Key benefits: EasyWalk platform profile, soundproofing, rubber inserts to guide walking

3

4

1 The TrendVario 4200 can take on two vehicles, one stacked over the other. 2 The TrendVario 4300 allows a third level. 3 + 4 The parking spaces in both systems can be moved horizontally and vertically. An empty space allows independent parking, meaning that a car can be placed regardless of whether the lower parking space is occupied.

When you smile, we have achieved our goal.

Premium parking systems from KLAUS Multiparking are tailored to individual requirements. By making the best possible use of available space, they truly make parking a breeze. Every one of our systems is the result of decades of experience, established expertise and the exceptional quality that is expected from products made in Germany.

KLAUS Multiparking is active all over the world: With over 500,000 parking spaces created and 65 sales partners representing every continent, we are one of the top international suppliers of innovative multiparking systems.
